What is CQ?

Cultural Intelligence (CQ) is a person's capability to function effectively in a variety of cultural contexts - both internationally and domestically.

In our own cultures, we usually have an idea of what's going on around us because we have a wealth of information, most of which is subconscious, that helps us make sense of what we experience and observe. When we interact with individuals who have a different cultural background, the same cues may mean something entirely different.

CQ CAPABILITIES

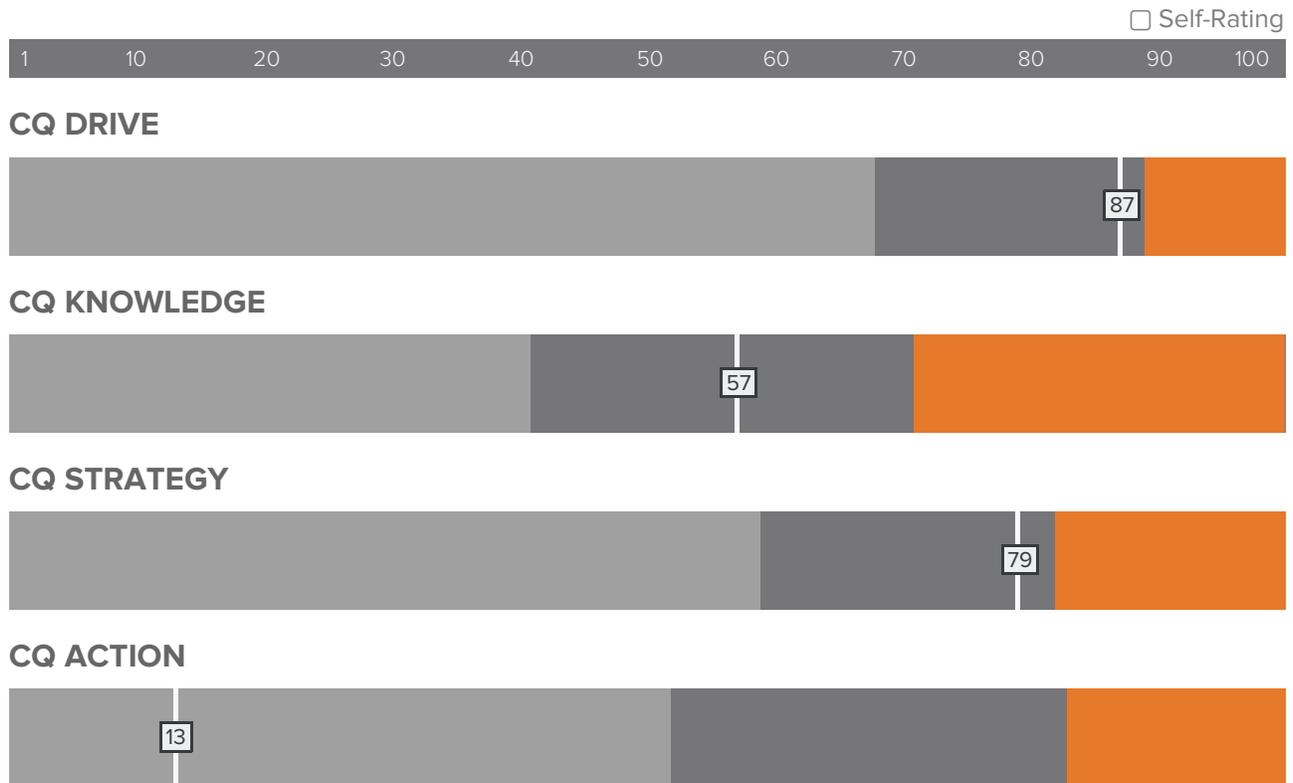

There are four primary CQ capabilities.

CQ Profile

This page summarizes your scores for the four primary CQ capabilities. The graphs indicate the worldwide norms and show typical differences in the scores across the four capabilities. Note your self-ratings (in the squares).

<p>LOW</p> <p>Scores in this range are in the bottom 25% of worldwide norms.</p>	<p>MODERATE</p> <p>Scores in this range are in the middle 50% of worldwide norms.</p>	<p>HIGH</p> <p>Scores in this range are in the top 25% of worldwide norms.</p>

Development Plan

Your CQ is not fixed. With some simple but intentional goals and strategies, you can enhance your CQ. The next few pages give you a chance to reflect on your CQ capabilities, your multicultural challenges and opportunities, and your CQ feedback. Then you will have a chance to develop an action plan.

YOUR CQ

Describe your self-rated CQ scores in your own words.

PRESENT CHALLENGES

What intercultural challenges are you currently facing?

(e.g. working with someone who has different cultural values, cultural misunderstandings, etc.)

FUTURE OPPORTUNITIES

What multicultural or global opportunities do you want to pursue?

(e.g. global leadership, teaching a diverse population of students, multicultural management, etc.)

YOUR STRONGEST CQ CAPABILITIES

Your strongest CQ capabilities are based on your self scores in comparison to the worldwide median, not simply based on the highest numerical scores.

Your strongest self-rating in the four CQ capabilities is **CQ KNOWLEDGE**

Write down one example of how you have used **CQ Knowledge** in the last 6 months.

HIGHEST SUB-DIMENSIONS, SELF-RATINGS:

Checking

Checking assumptions and adjusting mental maps when experiences differ from expectations.

Extrinsic Interest

Gaining benefits from culturally diverse experiences.

Nonverbal

Modifying nonverbal behaviors (e.g., gestures, facial expressions).

How, if at all, does your current role allow you to use your highest sub-dimensions?

YOUR WEAKEST CQ CAPABILITIES

Your weakest CQ capabilities are based on your self scores in comparison to the worldwide median, not simply based on the lowest numerical scores.

Your weakest self-rating in the four CQ capabilities is **CQ ACTION**

Write down one example of how your **CQ Action** may have caused problems for you in the past 6 months.

LOWEST SUB-DIMENSIONS, SELF-RATINGS:

Awareness

Sensing the perspectives of self and others.

Self-Efficacy

Having the confidence to be effective in culturally diverse situations.

Research Basis of CQ

THE RESEARCH BASIS FOR ASSESSING CULTURAL INTELLIGENCE

Cultural Intelligence is conceptualized as a multi-dimensional construct based on application of Robert Sternberg's integrative theoretical framework of different "loci" of intelligence. The dimensions of Cultural Intelligence represent qualitatively different aspects of the overall capability to function and manage effectively in culturally diverse settings.

CULTURAL INTELLIGENCE IS ...

Cultural Intelligence is a malleable capability that can be enhanced by multicultural experiences, training and self-awareness programs, travel and education.

Cultural Intelligence is distinct from stable individual differences such as personality, which describe what a person typically does across time and across situations.

Cultural Intelligence is also different from emotional intelligence because it focuses specifically on capabilities in multicultural contexts.

Cultural Intelligence has predictive validity over and above demographic characteristics, personality, general mental ability, emotional intelligence, cross-cultural adaptability inventory, rhetorical sensitivity, cross-cultural experience, and social desirability.

The Cultural Intelligence Scale has excellent psychometric properties.

Published scholarly research demonstrates the factor structure of the scale is stable across samples, across time, and across cultures.

In addition, self-rated scores are positively correlated with observer-rated scores, and multi-trait multi-method analysis supports the convergent and discriminant validity of the scale.

Reliabilities of the four factors and sub-dimensions exceed the standard cut-off of .70.

Most important, research demonstrates that cultural intelligence predicts adjustment, well-being, cultural judgment and decision-making, and task performance in culturally diverse settings.
